## BY TELEGRAPH.

Lee has gone to Oppose Sherman.

Gen. Joe. Johnson takes Command.

Part of Lee's Army Ordered South.

Petersburg about to be Evacuated.

Troops Taken from the Batteries.

Orders the Removal of Valuables.

Lee Intends Evacuating Richmond.

Blockade Runner Desoto Taken.

NEW YORK, Feb. 27.—The Herald's James L. Goodwin, and the General Lee, are going southward to conduct the operations of Sherman, leaving Jeff Davis in command at Richmond and Petersburg.

A large part of the rebel army which arrived at Richmond, had, on Saturday, been unable to be gathered for several days, and an inconsiderable number of rebel troops had been reported to have been dispatched against Sherman.

Parts of Lee's designs to shortly abandon Petersburg and Richmond are reported, and it is said that the news has been given to the people of the South to have their influence and other forces removed within four days.

They say that nearly all the artillery has been removed from the Petersburg batteries, and is being sent to keep up appearance.

Heavy artillery practice, continuing for several hours, was indulged in on Thursday and Friday last by the opposing guns of Petersburg.

The battles, however, were few, and the losses appear to have resulted in the capture of rebel deserts pouring across Union lines, averaging one hundred and twenty-five of them now, along with their arms and equipments, and the cavalrymen bring their horses.

At the fall of Charleston, S. C., troops from the South have joined the deserting army.

The railroad system, of last Friday, was reported to be in full blast, was again in full blast, and Judge Hughes, on his way to Washington to Richmond, arrived at the Point on Saturday last.

The steamship, which left Charleston on the 25th, with the national flag was flying at half-mast, and all the forts in the harbor.

General Lee's headquarters were reported to be in the city. The forts which remain in the city are of a most formidable character, and are unassisted, and vessels, filled into the hands of the United States forces. About six thousand tons of cotton were burned by the rebels, as they left, but it is believed that a quantity of it was saved.

The rebel guard were to be sent to the market, and fire the houses, but most of the poor remained in the city, and the wealthier leaving with the rebel army.

At the fall of Sumter, the rebels had captured the fort, and were captured in the night of the 14th, while marching out towards the city, their officers were entirely ignorant of the change in

## RIVER MATTERS.

Lee has gone to Oppose Sherman.

Gen. Joe. Johnson takes Command.

Part of Lee's Army Ordered South.

Petersburg about to be Evacuated.

Troops Taken from the Batteries.

Orders the Removal of Valuables.

Lee Intends Evacuating Richmond.

Blockade Runner Desoto Taken.

NEW YORK, Feb. 27.—The Herald's James L. Goodwin, and the General Lee, are going southward to conduct the operations of Sherman, leaving Jeff Davis in command at Richmond and Petersburg.

A large part of the rebel army which arrived at Richmond, had, on Saturday, been unable to be gathered for several days, and an inconsiderable number of rebel troops had been reported to have been dispatched against Sherman.

Parts of Lee's designs to shortly abandon Petersburg and Richmond are reported, and it is said that the news has been given to the people of the South to have their influence and other forces removed within four days.

They say that nearly all the artillery has been removed from the Petersburg batteries, and is being sent to keep up appearance.

The river at Petersburg had risen 15 feet, but the day yesterday it had risen only 10 inches, with some 160 feet water in the canal in the evening at dusk. During the previous 24 hours it had risen 33 feet to the head of the falls, and some 8 or 9 feet in Portland. The weather was cool and cloudy yesterday, with the thermometer at 45° in the afternoon.

On the falls there is an abundance of water for all navigable purposes, and steam-boats can ascend the middle chute without any trouble.

The Naugatuck came down from Cincinnati yesterday, and is at the city wharf. She is the regular Evansville and Henderson packet this evening, starting at five o'clock, in charge of Capt. Ballard.

The Naugatuck came down from Cincinnati yesterday, and is at the city wharf. She is the regular Evansville and Henderson packet this evening, starting at five o'clock, in charge of Capt. Ballard.

The river here is about at the same stage as at the last rise, and it had begun to find its way into several of the smaller streams, and was flowing over the bars, and had made a hole at 15 feet, and 20 cells machine at 100°, and 150°, and 160°, and 170°, and 180°, and 190°, and 200°, and 210°, and 220°, and 230°, and 240°, and 250°, and 260°, and 270°, and 280°, and 290°, and 300°, and 310°, and 320°, and 330°, and 340°, and 350°, and 360°, and 370°, and 380°, and 390°, and 400°, and 410°, and 420°, and 430°, and 440°, and 450°, and 460°, and 470°, and 480°, and 490°, and 500°, and 510°, and 520°, and 530°, and 540°, and 550°, and 560°, and 570°, and 580°, and 590°, and 600°, and 610°, and 620°, and 630°, and 640°, and 650°, and 660°, and 670°, and 680°, and 690°, and 700°, and 710°, and 720°, and 730°, and 740°, and 750°, and 760°, and 770°, and 780°, and 790°, and 800°, and 810°, and 820°, and 830°, and 840°, and 850°, and 860°, and 870°, and 880°, and 890°, and 900°, and 910°, and 920°, and 930°, and 940°, and 950°, and 960°, and 970°, and 980°, and 990°, and 1000°, and 1010°, and 1020°, and 1030°, and 1040°, and 1050°, and 1060°, and 1070°, and 1080°, and 1090°, and 1100°, and 1110°, and 1120°, and 1130°, and 1140°, and 1150°, and 1160°, and 1170°, and 1180°, and 1190°, and 1200°, and 1210°, and 1220°, and 1230°, and 1240°, and 1250°, and 1260°, and 1270°, and 1280°, and 1290°, and 1300°, and 1310°, and 1320°, and 1330°, and 1340°, and 1350°, and 1360°, and 1370°, and 1380°, and 1390°, and 1400°, and 1410°, and 1420°, and 1430°, and 1440°, and 1450°, and 1460°, and 1470°, and 1480°, and 1490°, and 1500°, and 1510°, and 1520°, and 1530°, and 1540°, and 1550°, and 1560°, and 1570°, and 1580°, and 1590°, and 1600°, and 1610°, and 1620°, and 1630°, and 1640°, and 1650°, and 1660°, and 1670°, and 1680°, and 1690°, and 1700°, and 1710°, and 1720°, and 1730°, and 1740°, and 1750°, and 1760°, and 1770°, and 1780°, and 1790°, and 1800°, and 1810°, and 1820°, and 1830°, and 1840°, and 1850°, and 1860°, and 1870°, and 1880°, and 1890°, and 1900°, and 1910°, and 1920°, and 1930°, and 1940°, and 1950°, and 1960°, and 1970°, and 1980°, and 1990°, and 2000°, and 2010°, and 2020°, and 2030°, and 2040°, and 2050°, and 2060°, and 2070°, and 2080°, and 2090°, and 2100°, and 2110°, and 2120°, and 2130°, and 2140°, and 2150°, and 2160°, and 2170°, and 2180°, and 2190°, and 2200°, and 2210°, and 2220°, and 2230°, and 2240°, and 2250°, and 2260°, and 2270°, and 2280°, and 2290°, and 2300°, and 2310°, and 2320°, and 2330°, and 2340°, and 2350°, and 2360°, and 2370°, and 2380°, and 2390°, and 2400°, and 2410°, and 2420°, and 2430°, and 2440°, and 2450°, and 2460°, and 2470°, and 2480°, and 2490°, and 2500°, and 2510°, and 2520°, and 2530°, and 2540°, and 2550°, and 2560°, and 2570°, and 2580°, and 2590°, and 2600°, and 2610°, and 2620°, and 2630°, and 2640°, and 2650°, and 2660°, and 2670°, and 2680°, and 2690°, and 2700°, and 2710°, and 2720°, and 2730°, and 2740°, and 2750°, and 2760°, and 2770°, and 2780°, and 2790°, and 2800°, and 2810°, and 2820°, and 2830°, and 2840°, and 2850°, and 2860°, and 2870°, and 2880°, and 2890°, and 2900°, and 2910°, and 2920°, and 2930°, and 2940°, and 2950°, and 2960°, and 2970°, and 2980°, and 2990°, and 3000°, and 3010°, and 3020°, and 3030°, and 3040°, and 3050°, and 3060°, and 3070°, and 3080°, and 3090°, and 3100°, and 3110°, and 3120°, and 3130°, and 3140°, and 3150°, and 3160°, and 3170°, and 3180°, and 3190°, and 3200°, and 3210°, and 3220°, and 3230°, and 3240°, and 3250°, and 3260°, and 3270°, and 3280°, and 3290°, and 3300°, and 3310°, and 3320°, and 3330°, and 3340°, and 3350°, and 3360°, and 3370°, and 3380°, and 3390°, and 3400°, and 3410°, and 3420°, and 3430°, and 3440°, and 3450°, and 3460°, and 3470°, and 3480°, and 3490°, and 3500°, and 3510°, and 3520°, and 3530°, and 3540°, and 3550°, and 3560°, and 3570°, and 3580°, and 3590°, and 3600°, and 3610°, and 3620°, and 3630°, and 3640°, and 3650°, and 3660°, and 3670°, and 3680°, and 3690°, and 3700°, and 3710°, and 3720°, and 3730°, and 3740°, and 3750°, and 3760°, and 3770°, and 3780°, and 3790°, and 3800°, and 3810°, and 3820°, and 3830°, and 3840°, and 3850°, and 3860°, and 3870°, and 3880°, and 3890°, and 3900°, and 3910°, and 3920°, and 3930°, and 3940°, and 3950°, and 3960°, and 3970°, and 3980°, and 3990°, and 4000°, and 4010°, and 4020°, and 4030°, and 4040°, and 4050°, and 4060°, and 4070°, and 4080°, and 4090°, and 4100°, and 4110°, and 4120°, and 4130°, and 4140°, and 4150°, and
